

Author response to the reporting checklist

Paper title: *(fill in)*

Version and date: *(fill in)*

Corresponding author: *(fill in)*

Code or data release: *(URL, DOI, or repository tag/commit)*

Instructions. For each item, select `reported`, `partially_reported`, `not_reported`, or `not_applicable`; provide a one–three sentence response; and identify the exact source location. Use `not_applicable` only when the corresponding workflow component or material concern is absent, and state why. The state records reporting completeness rather than methodological quality.

Required reporting items

ID	Item	State	Response	Source location / artefact
D1	Data	<i>(state)</i>	<i>(response)</i>	<i>(exact location)</i>
S1	Splits	<i>(state)</i>	<i>(response)</i>	<i>(exact location)</i>
M1	Inputs/Model	<i>(state)</i>	<i>(response)</i>	<i>(exact location)</i>
T1	Training	<i>(state)</i>	<i>(response)</i>	<i>(exact location)</i>
G1	Generation	<i>(state)</i>	<i>(response)</i>	<i>(exact location)</i>
E1	Metrics	<i>(state)</i>	<i>(response)</i>	<i>(exact location)</i>
B1	Baselines and ablations	<i>(state)</i>	<i>(response)</i>	<i>(exact location)</i>
F1	Feasibility	<i>(state)</i>	<i>(response)</i>	<i>(exact location)</i>
R1	Reproducibility	<i>(state)</i>	<i>(response)</i>	<i>(exact location)</i>

Context-dependent reporting items

ID	Item	State	Response	Source location / artefact
CL1	Closed-loop/UQ	<i>(state)</i>	<i>(response)</i>	<i>(exact location)</i>
C1	Compute footprint	<i>(state)</i>	<i>(response)</i>	<i>(exact location)</i>
GOV1	Governance and ethics	<i>(state)</i>	<i>(response)</i>	<i>(exact location)</i>

Optional key-number summary

ID	Item	State	Response	Source location / artefact
K1	Key-number summary	<i>(state)</i>	<i>(response)</i>	<i>(exact location)</i>

Suggested K1 fields. Total candidates; stagewise pass rates; validated outcomes; evaluator budget; closed-loop rounds and evaluations, where used; training and inference cost; and the versioned code or record identifier.
